

B100 Biodiesel
RME Premium

Up to 70% CO₂ reduction

Sustainable transport with B100 Biodiesel

Our B100 Biodiesel RME Premium is a fossil-free fuel specially designed to deliver 100% clean operation in bus, agricultural, and truck engines year-round! Biofuel Express is your partner when it comes to creating a more sustainable transportation solution.

Requirements for high quality?

Our strategically developed product meets all your high-quality requirements. Our biodiesel can be used as 100% B100 Biodiesel and exceeds the biodiesel standard EN 14214 by a good margin. It is also approved by leading engine manufacturers and works perfectly with the latest bus, agricultural, and truck engines.

Our biodiesel is produced from sustainable rapeseed oil and contains advanced components ensuring optimal operation and performance.

Your engine will feel the difference!

Our specially developed biodiesel ensures safe operation year-round. With high purity and good storage stability, you can rest assured that our fuel performs optimally. Our biodiesel has been patented post-treated to ensure even higher reliability. It also has excellent cold properties specially designed for the Nordic climate.

Our biodiesel can be used at low temperatures down to -20°C, and it contains a low level of ash-forming components.

A sustainable choice for the climate

When you choose our RME-based biodiesel, you've made a sustainable choice. Our fuel is based on rapeseed oil and is therefore green, fossil-free, and biodegradable. By using our biodiesel, you can achieve up to a 70% reduction in CO₂, which has significant benefits for the climate.

We have also increased the content of biomethanol to achieve a higher share of biomass and further improved environmental properties. Our biodiesel meets sustainability criteria according to EU-RED II.

Highest quality biodiesel

Biofuel Express offers the highest quality of B100 Biodiesel available in the European market, surpassing the biodiesel standard quality EN14214 by a good margin.

Our biodiesel is specially developed for 100% operation and is produced through a patented post-treatment process. This means that our biodiesel is much cleaner than most RME qualities on the market and performs better under Nordic winter conditions.

Reduce Your CO₂ Footprint Instantly

Make a smart decision for your business and the environment by switching to B100 Biodiesel RME Premium. Achieve a significant reduction in your CO₂ footprint without compromising on quality. Traditional diesel poses a burden and has negative consequences for both the environment and the climate.

In the table on the right, you can see an example of the positive results in relation to your CO₂ footprint. The calculation is based on one truck - imagine how it would look with multiple trucks.

Refueling or delivery? You decide

We make it easy for you to access our biodiesel. You can fill up your tank at one of our many fuel stations in Sweden and Denmark, or if you prefer, we can also deliver B100 Biodiesel RME Premium directly to your own tank (bulk) through our robust distribution network. Regardless, we ensure you a safe delivery.

Example of CO ₂ savings	
Number of trucks	1
Number of kilometers per month per truck	15.000 km
Average fuel consumption per kilometer	0,35 liter
Increased fuel consumption	3%

An environmentally friendly choice with many benefits

-  Reduces CO₂ emissions by up to 70%
-  Good lubricating properties and performs well in all FAME-approved engines
-  Biodegradable
-  Can be used at low temperatures - down to -20°C

Biofuel Express Insight provides an easy overview of fuel consumption, complete transparency within sustainability, and documentation with just a few clicks.

Its purpose is to provide full insight and thus serve as a tool to reduce your company's climate impact and document achieved CO₂ savings.

This way, you can meet the demands for environmental and climate responsibility today and in the future:

- Monitor CO₂ reductions
- Track fuel consumption in real-time
- Download sustainability certificates
- Gain insight into raw materials and their origin

Biofuel Express is a leading distributor of 100% fossil-free biofuels such as HVO100 Renewable Diesel and B100 Biodiesel RME Premium. Our primary focus is on the 100% biofuel market. We are passionate about the green impact of sustainable fuels on the environment.

Specializing in providing advice and calculating the benefits of fossil fuels, Biofuel Express is the right partner for those looking to transition to 100% fossil-free operation for their diesel-powered vehicles.

For the past 15 years, we have specialized in converting fleets and equipment from regular diesel to 100% fossil-free operation for buses, trucks, and cars.

Our market-leading, high-quality products can be refueled directly at our stations in Sweden and Denmark or delivered to your own tanks. Biofuel Express is your guarantee for reliable distribution.
